WORK EXPERIENCE

ACCENTURE | ASSOCIATE SOFTWARE ENGINEER
July 2019 - Nov 2019 | Pune
- Trained to build and work with Web Applications using JavaScript based Stacks.

BHUBANESWAR SMART CITY LIMITED(BSCL) | FULL STACK WEB DEVELOPER
December 2016
- Worked with Bhubaneswar Smart City Project
- Developed entire Web Applications using JavaScript, HTML, CSS3.
- Used JavaScript based frameworks such as Jquery.
- Implemented concepts of AJAX to fetch data.

PROJECTS

RICK AND MORTY DATABASE | REACT, REST API, SASS, CONTEXT - API
- Application which render over 500 different characters and various stats using REST API
- Built a toggle button for dark/light mode using Context-API state Management
- Used CSS Pre-Processors, SASS

WEATHER APP | REACT, REST API, SASS, STYLED-COMPONENTS
- Application which displays data according to given entered location
- It uses a REST API protocol to fetch data from "openweathermap.org"

TODOS | REACT, SASS, LOCAL STORAGE
- A To-do list built using React where a user can enter a number of tasks.
- Built a button,which when clicked will randomize the tasks
- Used browser's local storage to save the tasks from getting lost when refreshed

POKEDEX | REACT, SASS
- Application which renders over 900 different Pokemon with their stats and images
- Used REST API hosted on GitHub, to fetch data and images.
- Hosted on Netlify
